

LLTableDialog::LLTableDialog

```
graph LR; LLTableDialog[LLTableDialog::LLTableDialog] --> getTableData[LLTableDialog::getTableData]; LLTableDialog --> guidedRequested[LLTableDialog::guidedRequested]; LLTableDialog --> keepHeightForWidth[AppLayout::keepHeightForWidth]; LLTableDialog --> setInitialData[LLTableDialog::setInitialData]; LLTableDialog --> submitted[LLTableDialog::submitted]; keepHeightForWidth --> heightKeeper[AppLayout::HeightForWidthKeeper::HeightForWidthKeeper];
```

The diagram illustrates the relationships between the `LLTableDialog` class and its various methods and associated classes. The `LLTableDialog::LLTableDialog` class is the central entity, shown in a grey box. It has five outgoing associations to other elements: `LLTableDialog::getTableData`, `LLTableDialog::guidedRequested`, `AppLayout::keepHeightForWidth`, `LLTableDialog::setInitialData`, and `LLTableDialog::submitted`. Additionally, there is a self-association on `AppLayout::keepHeightForWidth` and an association from `AppLayout::keepHeightForWidth` to `AppLayout::HeightForWidthKeeper::HeightForWidthKeeper`.
